R-Style Lab

R-Style Lab offers full-cycle software development. We specialize in software & middleware for IoT, web and mobile solutions, TVOS apps and Augmented Reality.

10 years in IT

120+ developers

210+ projects

90+ happy clients

WE OFFER

Strong in-house team: developers with 4-7 yrs' of experience

R&D department with **PhD & Masters** of Math, Physics & Computer Science

Scalability: we're part of NY software house & can use their team to scale ours

Simplicity: 1 whatever-what contact person to guide you through dev process

Help in agreeing budgets & deadlines with Investors &/or Executive Board

If you're startup, we'll **help pitch your idea** (all the tech stuff & presentation materials)

Consultation on the most cost-effective pricing model, optimum methodology and technology for your project.

By the way our dev center is in Belarus: place where the founders of MSQRD, Viber & MapsMe started their businesses & country which developers are highly rated on Stackoverflow.

We offer various pricing models to our clients (Time & Material, Dedicated Team, Fixed Price) and work with different methodologies (Agile, Waterfall, Traditional methodologies) choosing the one more suitable for a particular project.

WHEN TO USE:	TIME & MATERIAL	FIXED PRICE	DEDICATED TEAM
Size of project	medium & large	small & medium	medium & large
Requirements	evolving	defined	evolving
Flexibility	+	-	+
Scope & cost changes	may vary	defined	may vary
Client's control	full	little	full
WHEN TO USE:	CIM (RUP)	WATERFALL	AGILE

We offer free consultation to our clients to help them choose the best options for their projects.

WHY CHOOSE R-STYLE LAB

R-Style Lab was founded in 2006 as a part of NY-based software house.
We began with a sales office in San Francisco, CA and a little R&D center in Minsk, Belarus.
And here we are 10 years later – a successful custom software development company with
120+ developers in our dev center and 85+ happy clients all over the world.

SEEING IS BELIEVING: CHECK OUT THIS VIDEO ABOUT US!

Proficiency: 10+ years in IT, 210+ projects delivered to 90+ happy clients.

Smooth & simple workflow: besides the trained & certifies PMs, BAs we also appoint one whatever-what contact person to guide you through the project.

Strong & well-balanced in-house team: 40% of the team are senior developers with 7+ years' experience + middle & junior developers.

Help startups with pitching their ideas (tech part + materials for presentation).

R&D: we love it and do some really interesting things: AI, connected house technologies; face & voice recognition systems, etc.

Consultation on the choice of the most **cost-effective pricing model, optimum methodology & technology** for the project.

Scalability: in case our 120+ developers are not enough we can borrow resources from our US teams as we are a part of NY-based software house.

Help in agreeing budgets and deadlines with Investors and/or Executive Board.

Work with R-Style Lab is a classic example of successful IT-outsourcing. We've been fully satisfied with the professional level of the work done.

Sergey Kiruschin, Head of IT at Aeroflot

R-Style Lab have fulfilled the task assigned to the full extent of their power. All the works were completed on a very high professional level.

Mark Valentini, CIO of "Red Square" Ltd.

R-Style Lab developed a fault-tolerant & easy-scalable system improving customer service, optimizing employees' work & structuring data processing.

Alexander Arikainen, Administrative Director at Dentu-Smart

R-Style Lab solution allowed us to improve the quality of communication in the company & reduce its costs.

Anton Karzhavin, Project Manager at Rive Gauche

They are hands down the best I've seen: excellent communication skills, thorough QA practices, & superb technical expertise.

Hunter Jensen, CEO at Barefoot Solutions, Inc.

According to our estimates, the R-Style Lab's delivered project let us lower the operational costs by almost 2 times.

Andrey Golovchanov, PM at Uhrenholt

I think R-Style Lab works very well, and the project manager I have is very talented and reliable.

Project Manager, Digital Design Agency

They are great at communication, and understanding the project. It's been good to work with such guys, who can understand what we need no matter what.

CEO, Niche Information Technology Firm

Their technical leadership is stellar. It's far and above anything that I've worked with in the past, and that trickles down to everyone on their team. They're very responsive to our needs and consistently go above and beyond.

Founder & CEO, Boutique Digital Agency

We had a good experience working with R-Style Lab. We find them extremely reliable and responsive, which are big things when working with an offshore provider. It's been a very fruitful partnership.

Product Manager, Marketing and Advertising Firm

The one thing that struck me was the accountability that they demonstrated. They take serious ownership of their work. They're always on the lookout for things that they can improve, which makes them more of a partner than a vendor.

Head of Sales and Account Manager, Software Development Firm
